

# HELP YOUR CUSTOMERS MAXIMIZE THE BENEFITS OF THEIR INVESTMENT AND OPTIMIZE VISIBILITY

start

## ZEBRA DEVICES ARE JUST THE BEGINNING

Now, with Zebra's **Asset Visibility Service (AVS)** and **Operational Visibility Service (OVS)**, your customers will have additional visibility into their environment that they've never had before.

Where their devices are

How their devices are performing

If the devices are being fully utilized

If the devices are properly configured with a fully charged battery

How operational processes are performing

Increase visibility and efficiency, reduce costs, and increase your device uptime. Depending upon your customers' needs, add AVS or OVS on top of your Zebra OneCare support contracts—allowing you and your customers more in-depth visibility into their environment to make better operational decisions, while also adding to **your** revenue and margins.

### AVS

VS

### OVS

High-level view of device health, geo-location, device metrics, and repair information

Low-touch, self-onboarding process

No MDM tool required

No device quantity minimum

Zebra Mobile Computing devices

Replaces manual asset tracking

Identification, location and condition of devices

OVS Dashboard providing up to 20 operational reports

Repair and support data

Zebra Mobile Computing devices, Link-OS printers, 3rd party mobile computing devices

Both services developed for several verticals, including healthcare, manufacturing, transportation and logistics, retail, and government, among others, and are powered by Zebra's Asset Visibility Platform (AVP)

To learn more about the features of each service, contact your ScanSource sales rep at 800.944.2432 or Product Manager Shea Little at [Shea.Little@scansource.com](mailto:Shea.Little@scansource.com).

**OUR TENURED TECHNICAL SUPPORT AND SALES TEAMS HAVE YOU COVERED, FROM PRE-SALE TO IMPLEMENTATION AND POST-SALE SUPPORT.**
